Insight and Analysis

Gain insight into every UK industry and company with mnAi's proprietary business intelligence technology.

mnAi

Meaningful insight that goes deeper

We believe in a world where technology empowers.

mnAi's award-winning platform fuses big data with proprietary business intelligence functionality and will help your company map out a detailed and accurate landscape of your industry at the touch of a button.

This helps you identify actionable insight quickly and efficiently.

12.5bn
data points

170.4m
statutory records

375+
variables

37.1m
people

100m+
data points added every week

9m+
UK companies

The problem

- Manual Insight process is time consuming & expensive
- Data is disparate
- Limited reach and results

The solution

- Millions of data points processed weekly
- Vast data sets that are easy to interrogate
- Real-time insights and analysis

The benefits

- Enhanced operations
- Rich insights and analysis
- Wide ranging, from start-ups to listed corporations

With 300 different interactive maps, visualisations, charts and tables available, mnAi users can eliminate hundreds of hours of manual research by using our cutting edge technology combined with big data to generate meaningful insight.

From research on female entrepreneurs to the productivity of companies across regions and sectors, our data provides rich insight and analysis on the contributions made to the UK by companies of all sizes; from start-ups to listed corporations.

Real-time industry analysis

Generating data sets large enough to support policy, research or analysis on private companies is time consuming, expensive and manual. Not any more.

With billions of data points, our Insight software eliminates the need for time-consuming manual research.

Our solution provides cutting edge insight and analysis on every UK sector, industry and geography on a macro and micro level. And it's all in real-time.

With data covering financials, officers, shareholders, gender and geography, our data platform delivers a comprehensive picture of your sector and supply chain in minutes.
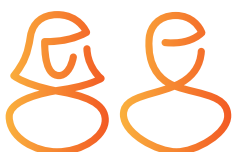

How you use your Insight technology is up to you: build bespoke visualisations and embed these directly into your organisation; enhance organisational knowledge through our pre-made templates; utilise a vast and ever-expaniding level of data covering emissions, diversity and more.

From productivity amongst nations to growth within sectors, our insight technology delivers an extensive overview of industries and companies instantly.

Complete financial records covering 9m+ UK companies offers a solution that provides a deep understanding of the external factors influencing growth within your target market, vertical or region.

Our proprietary algorithms will enhance your knowledge of the role gender plays in the companies within your search - plus data and insights on individuals by gender, ethnicity, leadership and ownership.

Our data in action

We've revolutionised Industry and company Insight with our AI insight software.
